

Helping Customers Better Understand the Data that Drives their Business

Overview

JCB Partners improves business performance by developing clients' Culture of Analytics™ and helping them better understand the data that drives their business. We incorporate best practices and proven approaches to business intelligence, budgeting and forecasting, enterprise reporting, scorecarding and dashboarding, and data warehousing solutions.

Business Situation

For most organizations, being flush with data has yet to yield the promising results of better, faster decisions. Legacy systems and processes were designed to support transactional and operational purposes. IT groups are strapped supporting operational systems. These truths are at odds with Executive management's expectation of introducing initiatives around Dashboards and Scorecards to help them better manage the business. The solution – transform Operational data into Analytical data.

Service Offerings

JCB Partners helps companies implement a process and technical framework around how they think, and how they need to operate. Our service offerings include:

- » Corporate Performance Management
- » Business Intelligence
- » Enterprise Planning & Consolidation
- » Process Improvement / Reengineering
- » Data Warehousing

JCB Partners is an information strategy consulting firm helping Fortune 1,000 clients understand the data that drives their business. As change agents and thought partners, JCB builds long-term relationships with clients. Our methodologies and practices are crafted to bring alignment between business and the information technology that supports it.

We understand that architecting a Culture of Analytics™ requires a capability beyond technology implementation. It requires a strategic, measured approach to ensure that strategies, processes and technologies are institutionalized.

Our services include Business Intelligence, Enterprise Planning, Scorecarding, Key Performance Metrics, Business Analytics, Data Warehousing, Data Marts, ETL tools and involve system integrations, strategy planning, system selection, architecture design, training and support.

JCB has strong Vertical expertise and headstart solutions for the Retail, Financial Services, Life Sciences, and Manufacturing industries.

The full capabilities of JCB are applied to the strategies and goals of your business. Our engineers, MBAs, CPAs and DBAs are dedicated and passionate about client success.
